You are receiving this email as a registered user of the iSystems (by TradingMotion) platform, currently enabled for your account at Automated Trading. To change which notification emails you receive, adjust the settings in the user profile section of the TradingMotion (iSystems) platform.

Disclaimer: Please note that the <https://automated.isystems.com> website reports hypothetical model account performance, and that past performance is not necessarily indicative of future results. You may earn money via a system activation, multiplier change, or deactivation - and you may lose money via any actions taken on the iSystems platform. You may activate/deactivate/reactivate systems as frequently or infrequently as you desire, and hereby acknowledge that the performance in your account may differ substantially from the listed performance of this system depending on the timing of such activations/deactivations and whether that timing resulted in certain profitable/unprofitable trades being realized, partially realized, or not realized for your account.

There exists a scenario where orders for systems you have enabled through the iSystems platform may be rejected by the FCM carrying your futures account. This can be due to several reasons, including risk and margin calls put in place by the FCM, their risk limits for your account not matching the number of contracts you choose to enable on the platform, and the FCM not setting up all of the markets available on the iSystems platform as available for your account to trade. You agree to hold iSystems harmless for any such rejections.

The acceptance of the terms displayed to you upon any and all activity on the iSystems platform certifies that you understand and assume the risks of using this service, and indemnify and hold harmless Automated Trading, TradingMotion and Attain Capital Management against any losses incurred in your account as a result of activities undertaken under your login on the iSystems (by TradingMotion) platform.

Futures trading carries the risk of substantial loss and is not suitable for all investors. For more info, please [click here](#).

This email confirms that you have **DEACTIVATED** the following system in your account on the iSystems (by TradingMotion) platform:

System Name	Agora Crude V2
Developer	YAt trading
Market	CL - Crude Oil Future (USD)
System Type	Intraday

Innovent Group LLC:

The following system has been **DEACTIVATED** for your account **E82600** due to insufficient funds to cover the required minimum balance across the system(s) active for your account on the iSystems (by TradingMotion) platform:

System Name	Theta3Russell 30'
Developer	Gestrading
Market	TFS - Mini-Russell Future (USD)
System Type	Swing
Multiplier	1
Deactivation Mode	Stop Immediately
Balance before de-activation	-17254 USD
Margin released	6000
Ticket #	138231

This system was selected for deactivation following the risk control procedure specified at the time of activation, and included in the iSystems (by TradingMotion) User Agreement:

"At the start of each trading session, we will verify if your account balance covers all the required minimums for your chosen system(s). If the balance is below what is required, the platform will automatically deactivate systems until the balance meets the required minimum. The priority for systems being deactivated will be those systems with no open positions first, sorted by most recently activated to least recently activated (longest active), and then those systems with open positions, sorted in the same manner."

You may re-activate this system at <https://automated.isystems.com>, after either adding funds to your account and/or de-activating other systems currently active for your account.
